

Window Covering Cords Can Kill

Prevent Child Strangulation

➤ Use cordless or inaccessible cord window coverings in homes with young children.

➤ Examine all shades and blinds for accessible cords on the front, side and back.

➤ Do not place cribs, beds and furniture close to the windows because children can climb on them and gain access to window covering cords.

➤ Check regularly that cords are out of reach of young children and cannot form hazardous loops.

➤ Install a tension device to keep continuous loop bead chains or nylon cords taut.
